

Benefits of CI/CD

In the Cloud

Continuous Integration: CI

It is an automation of integrating multiple code versions from multiple developers into a single repository where all these codes are merged, compiled and tested.

BENEFITS : Technical > Business

Smaller Code
Changes

**Faster Update
time**

Faster
Resolution

**Less revenue
loss**

Fault Isolation

Less Downtime

Faster Release

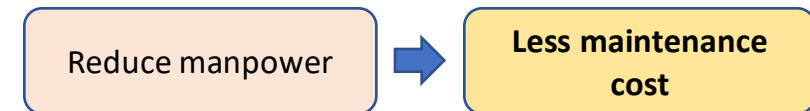

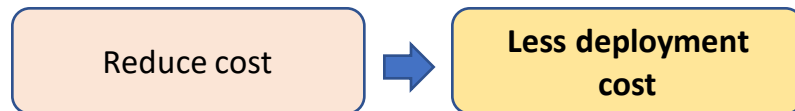

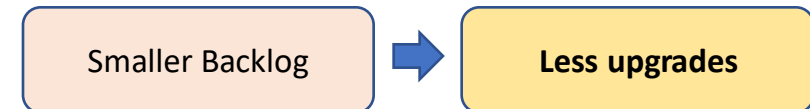

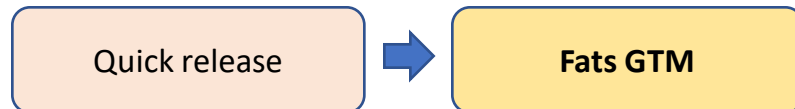

Quick GTM

Continuous Deployment: CI

It is an automation of deployment of software codes into the market where any code changes or updates are automatically released in the production or market for users to use.

BENEFITS : Technical > Business
